

ADR-20

WORM GEAR

GENERAL FEATURES

Ayvaz quarter turn mechanical reducers are suitable for use in general industrial applications, chemical processes, HVAC and irrigation systems. The spherical, butterfly and plug valves provide 80% ease of movement in 90 ° rotation systems.

It is recommended to use a reducer especially for DN 150-DN 300. It is necessary to use a reducer at diameters of DN 350 and above.

Ayvaz features quarter-turn mechanical gearboxes, 5% stroke adjustment, open-closed position indicator, waterproof gasket design, epoxy painted body and dialing flywheel.

Materials:

Body: Epoxy coated Ductile Iron

Connection:

ISO 5211

Temperature Range:

Depend on material from -20 °C to +70 °C

Applications:

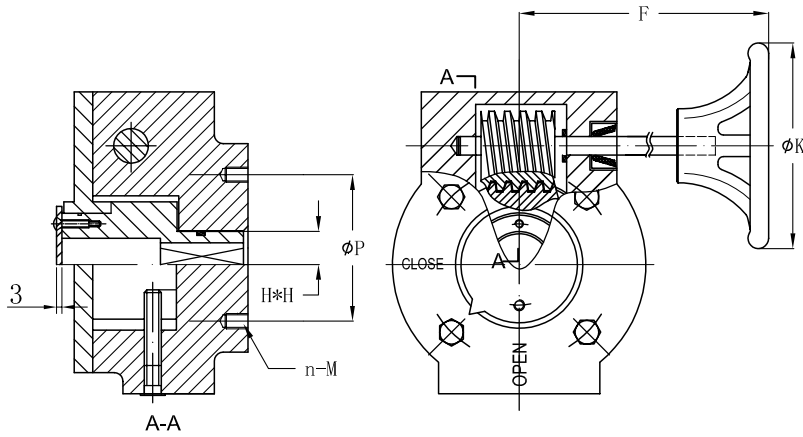

- Butterfly valve
- Ball Valve
- Knife Valve

PRODUCT FEATURES

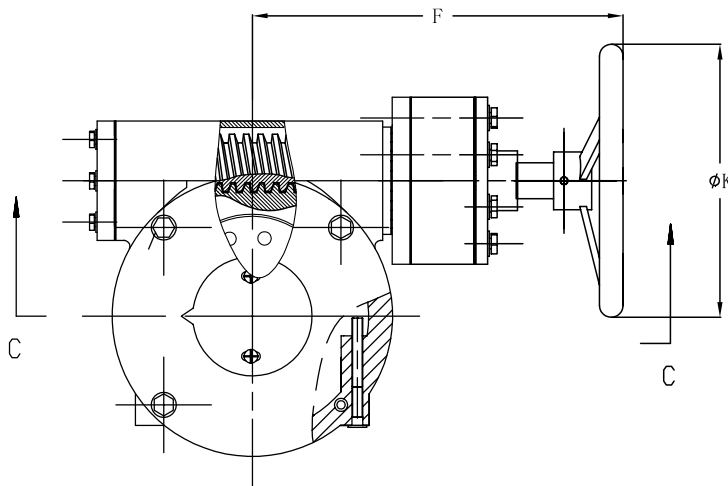

Body	Epoxy coated Ductile Iron
Connection	ISO 5211
Connection Temp.	-20/+70 °C
Diameter	DN25 - DN1200
